

April 9, 2021

As a major supplier to numerous US and Canadian distributors, Kanata Blanket Co. is taking necessary actions to ensure all products we carry are safe, socially and environmentally compliant. We ensure to supply products that have been produced in factories that comply with several safety, social, and environmental standards.

We make sure that chemicals used in the production of our products are within tolerable standards and in compliance with SGS testing requirements. SGS is one of the testing facilities that is knowledgeable about all requirements related to safety legislation in the US.

In consultation with SGS, all our blankets/products are tested every 2 years on the following protocols:

1. Flammability of blanket- ASTM D4151 – 2010
2. Canadian Textile Flammability (SOR/2016-194)
3. US Prop 65 – Lead
4. US Prop 65 – Phthalates

If these are not applicable to the product/s to be tested and/or additional tests needs to be done, we request our vendor/s to comply with the additional requirements.

Unit 100 – 13260 Delf Place
Richmond, BC V6V 2A2
