- The customizable *woven label* includes up to 2-3 colors.
- The customizable *heat-sealed label* includes 1c printing.
- The customizable *hangtag* includes 4/0 printing.

The Process

STEP 1 – CHOOSE YOUR SILHOUETTE

Start with a blank canvas inspired by the top selling styles you already know and love.

STEP 2 – GET CREATIVE!

Dye sublimation allows us to transform the ENTIRE garment into a full color masterpiece. Be as simple or creative as you want.

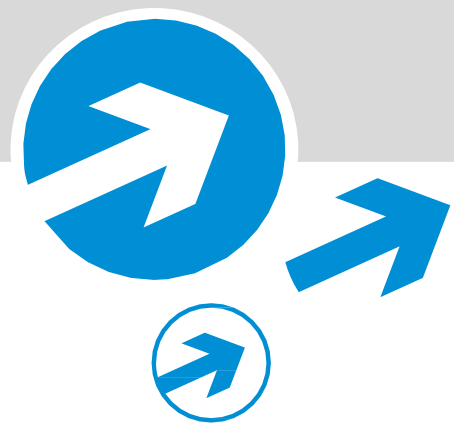

STEP 3 – DESIGN YOUR CUSTOM LABELS

Make it look retail. Each piece includes a custom hang tag and your choice of a woven or heat sealed label for no extra cost!

STEP 4 – ROCK YOUR SWAG

Custom apparel delivered to your door.

Order Timeline

Phase 1: First, a digital layout is provided within 2-3 days from review of your order and artwork files.

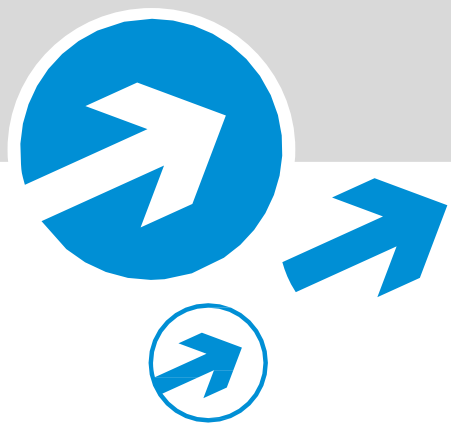

Phase 2: Physical samples are created and sent for approval within 10-14 days of digital layout approval.

Phase 3: Once physical samples have been approved, our factory will begin mass production of your order.

Phase 4a: Delivery by Ocean is approx. 7-8 weeks after sample approval – Delivery from the port to final destination is an additional cost.

Phase 4b: Delivery by Air is approx. 4-5 weeks after sample approval – Note, there is an additional charge for shipping via air.

What is Dye Sublimation?

The process of dye sublimation printing embeds the ink directly into the garment fabric via heat. Using special machines that combine high pressure and temperature, we embed the image in the actual fabric to create full color seamless designs.

Can I PMS match the fabric color?

Yes! Traditional fabric dyeing always extends order times by a few weeks, but we can bypass this process and PMS match your fabric color as close as possible using the dye sublimation process.

Can I customize any style/fabric I want?

Only the SA apparel style numbers and fabrics can be custom dye sublimated. The garments must be polyester for the decoration technique to adhere. We have chosen the best silhouettes/fabrics to optimize your selection.

Will the image crack or fade over time?

No! This is one of the top reasons to dye sublimated apparel. The images print crisp and the inks are embedded in the fabric so they won't wash or fade over time. This makes it the perfect decoration method for sports teams, automotive, and recreational apparel.

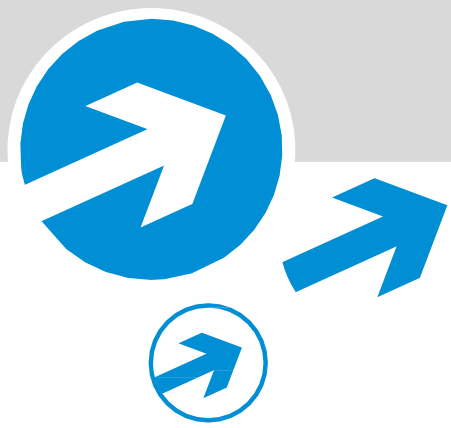

Are there added fees for setups and multiple colors?

Our pricing is fully inclusive of all set ups and all over, full color printing on the entire garment. (one design)

What art format do I need to supply?

All artwork must be submitted in vectorized AI format.

Can I add customized tags and labels for a retail look?

Yes, we include a printed hang tag (4/0) attached to the garment in addition to your choice of a custom woven label (2-3 colors) or a heat seal label (1 color).

What color buttons and zippers are available?

We have lots of standard colors available to pick from. When placing your order, we can find the color that best matches and provide images for your review.

Are the collars self fabric or ribbed?

Our Polo and Woven shirts include self fabric collars, which allow us to dye subliminate the material along with the rest of the garment.

Will I be able to see my custom creation prior to the entire run being printed?

First, a digital layout of your design will be provided within 2-3 days from receipt of your order and artwork submission. Then we will send a physical sample based on the digital proof for you to touch, feel, revise and approve before we print your full order.

What is the minimum amount I can order?

Our MOQ is 288 total units per style. These must all be the same design, but you may combine a variety of sizes and mix men's and ladies' (for applicable styles) to reach this amount.

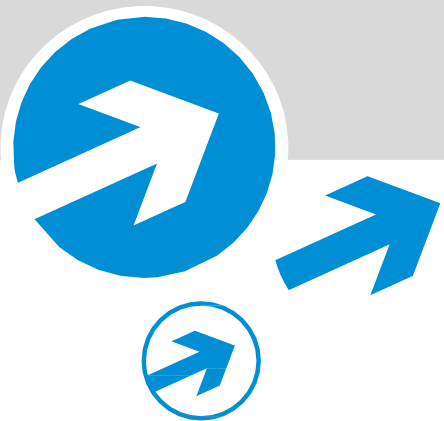

How long for my order to deliver?

One benefit of dye sublimation is the fast lead time. Prices include ocean shipping to the port of Los Angeles with delivery approximately 7-8 weeks after approval to start production.

Can my order ship by air?

Need delivery sooner? For an additional charge, we can ship via air with delivery approximately 4-5 weeks after approval to start production.

Short Sleeve Tee

Specifications
